

Nicole Protection

Safety Data Sheet — English translation of the Italian original · Manufacturer: Colorificio ATRIA S.r.l., Partanna (TP), Italy · Revision n.2 of 18/04/2025 (printed 18/04/2025; replaces revision 1, revision date 18/04/2025) · Product code: 08.NCL.9000 · Compliant with Annex II of REACH — Regulation (EU) 2020/878 · Sold in the US as Nicole

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Code:	08.NCL.9000
Name	Nicole Protection
Chemical name and synonyms	Modified acrylic emulsion
Code notified to the ISS (Italian National Institute of Health) — Company code:	00013450812
Preparation code:	08.NCL.9000

1.2. Relevant identified uses of the substance or mixture and uses advised against

Description/Use	Protective resin for Nicole
-----------------	-----------------------------

1.3. Details of the supplier of the safety data sheet

Company name	COLORIFICIO ATRIA S.R.L.
Address	Contrada Camarro Formeca
Town and Country	91028 PARTANNA (TP), ITALY tel. +39 0924 49500 fax +39 0924 921250
E-mail address of the competent person responsible for the safety data sheet	amario@atria.it
Supplier:	Colorificio Atria Srl
US distributor:	ATRIA USA / Euro Star Enterprises LLC, 17811 Davenport Road Suite 12, Dallas TX 75252, USA — sales@atria-usa.com — +1 972-965-5881

1.4. Emergency telephone number

For urgent inquiries contact	Colorificio Atria Srl - Technical Office +39 0924 49500, hours 08.00–13.00 / 14.30–17.00, excluding holidays US contact: ATRIA USA 972-965-5881 (business hours) Poison Control Centres (Italy): CAV "Osp. Pediatrico Bambino Gesù", Roma — Piazza Sant'Onofrio, 4 — Tel. 06 68593726 Az. Osp. Univ. Foggia, Foggia — V.le Luigi Pinto, 1 — Tel. 0881-732326 Az. Osp. "A. Cardarelli", Napoli — Via A. Cardarelli, 9 — Tel. 081-7472870 CAV Policlinico "Umberto I", Roma — V.le del Policlinico, 155 — Tel. 06-49978000 CAV Policlinico "A. Gemelli", Roma — Largo Agostino Gemelli, 8 — Tel. 06-3054343 Az. Osp. "Careggi" U.O. Tossicologia Medica, Firenze — Largo Brambilla, 3 — Tel. 055-7947819 CAV Centro Nazionale di Informazione Tossicologica, Pavia — Via Salvatore Maugeri, 10 — Tel. 0382-24444 Osp. Niguarda Ca' Granda, Milano — Piazza Ospedale Maggiore, 3 — Tel. 02-66101029 Azienda Ospedaliera Papa Giovanni XXII, Bergamo — Piazza OMS, 1 — Tel. 800883300
------------------------------	--

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The product is not classified as hazardous pursuant to the provisions of Regulation (EC) 1272/2008 (CLP). However, since the product contains hazardous substances in concentrations such that they must be declared in section 3, it requires a safety data sheet with adequate information, in compliance with Regulation (EU) 2020/878.

Classification and hazard statements:	—
---------------------------------------	---

2.2. Label elements

Hazard labelling pursuant to Regulation (EC) 1272/2008 (CLP) and subsequent amendments and adaptations.

Hazard pictograms:	—
Signal words:	—
Hazard statements:	EUH210 — Safety data sheet available on request. EUH208 — Contains: 2,4,7,9-tetramethyldec-5-yne-4,7-diol. May produce an allergic reaction.
Precautionary statements:	—

2.3. Other hazards

Based on available data, the product does not contain PBT or vPvB substances in percentage $\geq 0.1\%$.

The product does not contain substances with endocrine-disrupting properties in concentration $\geq 0.1\%$.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

Contains:

Identification	x = Conc. %	Classification 1272/2008 (CLP)
2,4,7,9-tetramethyldec-5-yne-4,7-diol INDEX — EC 204-809-1 CAS 126-86-3	$0.1 \leq x < 0.15$	Eye Dam. 1 H318, Skin Sens. 1 H317, Aquatic Chronic 3 H412

The full text of the hazard (H) statements is given in section 16 of this sheet.

SECTION 4: First aid measures

4.1. Description of first aid measures

No effects requiring special first aid measures are expected. The following information consists of practical guidance on correct behaviour in case of contact with a chemical product, even a non-hazardous one.

In case of doubt or in the presence of symptoms, contact a physician and show them this document.

In case of more severe symptoms, call the emergency medical services (in Italy, 118) for immediate medical assistance.

EYES: Remove contact lenses, if present and easy to do. Wash immediately and thoroughly with water for at least 15 minutes, keeping the eyelids well open. Consult a physician immediately.

SKIN: Remove contaminated clothing. Wash immediately and thoroughly with running water (and soap if possible).

Consult a physician. Avoid further contact with contaminated clothing.

INGESTION: Do not induce vomiting unless expressly authorized by a physician. Do not administer anything by mouth if

the subject is unconscious. Consult a physician immediately.

INHALATION: Move the subject to fresh air, away from the scene of the accident. Consult a physician immediately.

Protection of first aiders

It is good practice for the first aider assisting a person who has been exposed to a chemical substance or mixture to wear personal protective equipment. The nature of such protection depends on the hazardousness of the substance or mixture, the mode of exposure and the extent of contamination. In the absence of other more specific indications, the use of disposable gloves is recommended in case of possible contact with biological fluids. For the type of PPE suitable for the characteristics of the substance or mixture, refer to section 8.

4.2. Most important symptoms and effects, both acute and delayed

No specific information on symptoms and effects caused by the product is known.

DELAYED EFFECTS: Based on the information currently available, no cases of delayed effects following exposure to this product are known.

4.3. Indication of any immediate medical attention and special treatment needed

In case of symptoms, whether acute or delayed, consult a physician.

Means to be made available at the workplace for specific and immediate treatment

Running water for skin and eye washing.

SECTION 5: Firefighting measures

5.1. Extinguishing media

SUITABLE EXTINGUISHING MEDIA

Extinguishing media are the conventional ones: carbon dioxide, foam, powder and water spray.

UNSUITABLE EXTINGUISHING MEDIA

Do not use full water jets.

5.2. Special hazards arising from the substance or mixture

HAZARDS DUE TO EXPOSURE IN CASE OF FIRE: Any fires develop thick black smoke. Exposure to decomposition products may be hazardous to health.

Avoid breathing combustion products. Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, nitrogen oxides.

5.3. Advice for firefighters

GENERAL INFORMATION

Cool containers with water jets to prevent decomposition of the product and the development of substances potentially hazardous to health. Always wear full firefighting protective equipment. Collect firefighting water, which must not be discharged into sewers. Dispose of contaminated water used for extinguishing and fire residue in accordance with current regulations.

EQUIPMENT

Normal firefighting clothing, such as an open-circuit compressed-air self-contained breathing apparatus (EN 137), flame-retardant suit (EN 469), flame-retardant gloves (EN 659) and firefighter boots (HO A29 or A30).

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

In case of vapours or dusts dispersed in the air, adopt respiratory protection. These instructions apply both to processing workers and to emergency responders.

6.2. Environmental precautions

Prevent the product from entering sewers, surface waters or groundwater.

6.3. Methods and material for containment and cleaning up

Contain with earth or inert material. Collect most of the material and remove the residue with water jets. Disposal of contaminated material must be carried out in accordance with the provisions of point 13.

6.4. Reference to other sections

Any information regarding personal protection and disposal is given in sections 8 and 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Avoid contact with eyes and skin. Avoid inhalation of vapours, sprays and mists.

Eating, drinking and smoking are prohibited in areas where the material is handled, stored or processed.

Wear suitable protective equipment (see Section 8).

Never empty the product by subjecting it to pressure. The container is not pressurized.

Always keep the material in its original container.

Comply with the provisions of the laws on health and safety in the workplace.

Do not release the product into the sewer system or watercourses.

When workers, for spraying or other operations, must work inside the spray booth, the extraction conditions are likely insufficient to keep particulate matter and solvent vapours under control in all cases. In such circumstances, they must wear powered air-fed respiratory protection systems during spraying operations, and for as long as the concentrations of particulate matter and solvent vapours have not fallen below the exposure limits.

7.2. Conditions for safe storage, including any incompatibilities

Store in accordance with the regulations in force.

Notes on joint storage

Keep away from: oxidizing agents, strong alkalis, strong acids.

Additional information on storage conditions

Store in a dry, cool and well-ventilated environment. Keep the container tightly closed.

No smoking. No access to unauthorized persons. Opened containers must be carefully resealed and kept upright to prevent accidental spillage of the product.

7.3. Specific end use(s)

Information not available

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Regulatory references:

ITA	Italia	Decreto Legislativo 9 Aprile 2008, n.81
GBR	United Kingdom	EH40/2005 Workplace exposure limits (Fourth Edition 2020)
EU	OEL EU	Directive (EU) 2022/431; Directive (EU) 2019/1831; Directive (EU) 2019/130; Directive (EU) 2019/983; Directive (EU) 2017/2398; Directive (EU) 2017/164; Directive 2009/161/EU; Directive 2006/15/EC; Directive 2004/37/EC; Directive 2000/39/EC; Directive 98/24/EC; Directive 91/322/EEC.
	TLV-ACGIH	ACGIH 2023

ETHYLENE GLYCOL

Threshold limit value

Type	Country	TWA/8h		STEL/15min		Notes / Remarks
		mg/m3	ppm	mg/m3	ppm	
VLEP	ITA	52	20	104	40	SKIN
WEL	GBR	52	20	104	40	SKIN
OEL	EU	52	20	104	40	SKIN
TLV-ACGIH			25		50	
TLV-ACGIH				10		INALAB

Legend:

(C) = CEILING ; INALAB = Inhalable fraction ; RESPIR = Respirable fraction ; TORAC = Thoracic fraction.

VND = hazard identified but no DNEL/PNEC available ; NEA = no exposure expected ; NPI = no hazard identified ; LOW = low hazard ; MED = medium hazard ; HIGH = high hazard.

8.2. Exposure controls

Since the use of adequate technical measures should always take priority over personal protective equipment, ensure good ventilation of the workplace through effective local exhaust extraction.

HAND PROTECTION

Protect hands with category III work gloves.

For the final choice of work glove material (ref. standard EN 374), the following must be considered: compatibility, degradation, permeation time. In the case of preparations, the resistance of work gloves to chemical agents must be verified before use as it is not predictable. Gloves have a wear time that depends on the duration and mode of use.

SKIN PROTECTION

Wear long-sleeved work clothing and category I professional safety footwear (ref. Regulation 2016/425 and standard EN ISO 20344). Wash with soap and water after removing protective clothing.

EYE PROTECTION

It is advisable to wear airtight protective goggles (ref. standard EN ISO 16321).

RESPIRATORY PROTECTION

The use of respiratory protection equipment is necessary if the technical measures adopted are not sufficient to limit worker exposure to the threshold values under consideration. It is advisable to wear a mask with a type A filter, whose class (1, 2 or 3) must be chosen in relation to the limit concentration of use (ref. standard EN 14387).

If the substance in question is odourless or its odour threshold is higher than the corresponding TLV-TWA, and in case of emergency, wear an open-circuit compressed-air self-contained breathing apparatus (ref. standard EN 137) or a fresh-air

hose breathing apparatus (ref. standard EN 138). For the correct choice of the respiratory protection device, refer to standard EN 529.

ENVIRONMENTAL EXPOSURE CONTROLS

Emissions from production processes, including those from ventilation equipment, should be checked for compliance with environmental protection legislation.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Property	Value	Information
Physical state	liquid	Temperature: 25 °C
Colour	transparent	Temperature: 25 °C
Odour	imperceptible	
Melting point or freezing point	not available	
Initial boiling point	not available	
Flammability	not available	
Lower explosive limit	not available	
Upper explosive limit	not available	
Flash point	> 60 °C	
Auto-ignition temperature	not available	
Decomposition temperature	not available	
pH	8	Temperature: 25 °C
Kinematic viscosity	not available	
Dynamic viscosity	15000	Method: Brookfield viscometer; Temperature: 25 °C
Solubility	not available	
Partition coefficient: n-octanol/water	not available	
Vapour pressure	not available	
Density and/or relative density	1 kg/l	
Relative vapour density	not available	
Particle characteristics	not applicable	

9.2. Other information

9.2.1. Information with regard to physical hazard classes

Information not available

9.2.2. Other safety characteristics

Total solids (250°C / 482°F)	43.40 %	Temperature: 25 °C
VOC (Directive 2010/75/EU)	2.27 % — 22.65	g/litre

SECTION 10: Stability and reactivity

10.1. Reactivity

No specific experimental data on reactivity are available for this product or its ingredients.

10.2. Chemical stability

The product is stable under normal conditions of use and storage.

10.3. Possibility of hazardous reactions

Under normal conditions of use and storage, no hazardous reactions are foreseeable.

10.4. Conditions to avoid

None in particular. However, observe the usual precautions applicable to chemical products.

10.5. Incompatible materials

To avoid strong exothermic reactions, keep away from the following materials: oxidizing agents, strong alkalis, strong acids.

10.6. Hazardous decomposition products

Under normal storage and use conditions, hazardous decomposition products should not be generated.

SECTION 11: Toxicological information

In the absence of experimental toxicological data on the product itself, any health hazards of the product have been assessed on the basis of the properties of the substances it contains, according to the criteria set out in the reference legislation for classification.

Therefore, consider the concentration of the individual hazardous substances possibly listed in section 3 in order to assess the toxicological effects deriving from exposure to the product.

11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008

Metabolism, kinetics, mechanism of action and other information

Information not available

Information on likely routes of exposure

Information not available

Immediate, delayed and chronic effects from short- and long-term exposure

Information not available

Interactive effects

Information not available

ACUTE TOXICITY

ATE (Inhalation) of the mixture:	Not classified (no relevant component)
ATE (Oral) of the mixture:	Not classified (no relevant component)

ATE (Dermal) of the mixture:	Not classified (no relevant component)
------------------------------	--

SKIN CORROSION / SKIN IRRITATION

Does not meet the classification criteria for this hazard class

SERIOUS EYE DAMAGE / EYE IRRITATION

Does not meet the classification criteria for this hazard class

RESPIRATORY OR SKIN SENSITISATION

May produce an allergic reaction.

Contains:

2,4,7,9-tetramethyldec-5-yne-4,7-diol

GERM CELL MUTAGENICITY

Does not meet the classification criteria for this hazard class

CARCINOGENICITY

Does not meet the classification criteria for this hazard class

REPRODUCTIVE TOXICITY

Does not meet the classification criteria for this hazard class

SPECIFIC TARGET ORGAN TOXICITY (STOT) — SINGLE EXPOSURE

Does not meet the classification criteria for this hazard class

SPECIFIC TARGET ORGAN TOXICITY (STOT) — REPEATED EXPOSURE

Does not meet the classification criteria for this hazard class

ASPIRATION HAZARD

Does not meet the classification criteria for this hazard class

11.2. Information on other hazards

Based on available data, the product does not contain substances listed in the main European lists of potential or suspected endocrine disruptors with effects on human health under assessment.

SECTION 12: Ecological information

Use according to good working practices, avoiding dispersal of the product into the environment. Notify the competent authorities if the product has reached watercourses or has contaminated soil or vegetation.

12.1. Toxicity

Information not available

12.2. Persistence and degradability

Information not available

12.3. Bioaccumulative potential

Information not available

12.4. Mobility in soil

Information not available

12.5. Results of PBT and vPvB assessment

Based on available data, the product does not contain PBT or vPvB substances in percentage $\geq 0.1\%$.

12.6. Endocrine disrupting properties

Based on available data, the product does not contain substances listed in the main European lists of potential or suspected endocrine disruptors with effects on the environment under assessment.

12.7. Other adverse effects

Information not available

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Reuse, if possible. Product residues as such are to be considered special non-hazardous waste.

Disposal must be entrusted to a company authorized for waste management, in compliance with national and, where applicable, local regulations.

CONTAMINATED PACKAGING

Contaminated packaging must be sent for recovery or disposal in compliance with national waste management regulations.

SECTION 14: Transport information

The product is not to be considered dangerous under the current provisions on the transport of dangerous goods by road (A.D.R.), by rail (RID), by sea (IMDG Code) and by air (IATA).

14.1. UN number or ID number

not applicable

14.2. UN proper shipping name

not applicable

14.3. Transport hazard class(es)

not applicable

14.4. Packing group

not applicable

14.5. Environmental hazards

not applicable

14.6. Special precautions for user

not applicable

14.7. Maritime transport in bulk according to IMO instruments

Information not relevant

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

Seveso Category — Directive 2012/18/EU: None

Restrictions relating to the product or contained substances pursuant to Annex XVII of Regulation (EC) 1907/2006

None

Regulation (EU) 2019/1148 — on the marketing and use of explosives precursors

not applicable

Substances in Candidate List (Art. 59 REACH)

Based on available data, the product does not contain SVHC substances in percentage $\geq 0.1\%$.

Substances subject to authorisation (Annex XIV REACH)

None

Substances subject to export notification obligation under Regulation (EU) 649/2012:

None

Substances subject to the Rotterdam Convention:

None

Substances subject to the Stockholm Convention:

None

Health checks

Information not available

D.Lgs. 152/2006 and subsequent amendments

Emissions according to Part V Annex I:

TAB. D	Class III	00.32 %
WATER		07.73 %

15.2. Chemical safety assessment

A chemical safety assessment has not been prepared for the mixture / for the substances indicated in section 3.

SECTION 16: Other information

Text of the hazard (H) statements referred to in sections 2–3 of this sheet:

Eye Dam. 1	Serious eye damage, category 1
Skin Sens. 1	Skin sensitisation, category 1

Aquatic Chronic 3	Hazardous to the aquatic environment, chronic toxicity, category 3
H318	Causes serious eye damage.
H317	May cause an allergic skin reaction.
H412	Harmful to aquatic life with long lasting effects.
EUH210	Safety data sheet available on request.

LEGEND:

- ADR: European agreement for the transport of dangerous goods by road
- ATE / STA: Acute Toxicity Estimate
- CAS: Chemical Abstract Service number
- CE (EC): Identification number in ESIS (European archive of existing substances)
- CLP: Regulation (EC) 1272/2008
- DNEL: Derived no-effect level
- EC50: Concentration giving effect to 50% of the test population
- EmS: Emergency Schedule
- GHS: Globally Harmonized System of classification and labelling of chemicals
- IATA DGR: Dangerous Goods Regulation of the International Air Transport Association
- IC50: Immobilization concentration of 50% of the test population
- IMDG: International Maritime Code for the transport of dangerous goods
- IMO: International Maritime Organization
- INDEX: Identification number in Annex VI of CLP
- LC50: Lethal concentration 50%
- LD50: Lethal dose 50%
- OEL: Occupational exposure level
- PBT: Persistent, bioaccumulative and toxic
- PEC: Predictable environmental concentration
- PEL: Predictable exposure level
- PMT: Persistent, mobile and toxic
- PNEC: Predicted no-effect concentration
- REACH: Regulation (EC) 1907/2006
- RID: Regulation for the international transport of dangerous goods by rail
- TLV: Threshold limit value
- TLV CEILING: Concentration that must not be exceeded at any time during occupational exposure.
- TWA: Time-weighted average exposure limit
- TWA STEL: Short-term exposure limit
- VOC: Volatile organic compound
- vPvB: Very persistent and very bioaccumulative
- vPvM: Very persistent and very mobile
- WGK: Water hazard class (Germany).

Note for the user:

The information contained in this sheet is based on the knowledge available to us at the date of the latest version. The user must ensure the suitability and completeness of the information in relation to the specific use of the product. This document must not be interpreted as a guarantee of any specific property of the product. Since the use of the product does not fall under our direct control, it is the user's obligation to observe, under their own responsibility, the laws and provisions in force regarding hygiene and safety. No liability is assumed for improper use. Provide adequate training to personnel involved in the use of chemical products.

CLASSIFICATION CALCULATION METHODS

Physical-chemical hazards: The classification of the product was derived from the criteria established by the CLP Regulation Annex I Part 2. The methods for evaluating physical-chemical properties are reported in section 9.

Health hazards: The classification of the product is based on the calculation methods of Annex I of CLP Part 3, unless otherwise indicated in section 11.

Environmental hazards: The classification of the product is based on the calculation methods of Annex I of CLP Part 4, unless otherwise indicated in section 12.

Changes from the previous revision

Changes have been made to the following sections: 08 / 15.

This document is an English translation of the manufacturer's original Italian Safety Data Sheet (revision noted above), prepared by ATRIA USA / Euro Star Enterprises LLC, Dallas TX (sales@atria-usa.com, +1 972-965-5881) for the convenience of US customers. In case of discrepancy the Italian original prevails. The original is available on request.
